Why there should be a road from King Cove to Cold Bay.

I think that we should have a road from King Cove to Cold Bay because I want my family to be safe. If someone was to get sick, and the weather was too bad for the hovercraft and planes, they would not be able to get to Cold Bay for a medivac plane to come and get them. Just having the road could save a persons life.

Having a road could also add to possibility of actives for our school. We have had to live with he fact that if the weather is bad, you can't travel. We aren't like other kids in the lower 48, or even some in Alaska. We have no roads, no rivers that freeze, or any way out in bad weather. When there is bad weather, we miss out.

I want to be safe, and not have to fly on planes on really windy days. Flying through Leonard's Harbor is really scary when the wind is blowing really hard. It can be compared to riding on a really bouncy, scary roller coaster. Something I don't think people should have to go through just to get in or out of King Cove.

Please help save lives and give us permission to build our road.

Thank you
