Why We Need A Road

For the residence of King Cove, the connecting road to Cold Bay is crucial. The finishing off the road makes sure that it is always possible to evacuate if needed. It also reassures residence that in the case of a medical emergency, weather won't put their health in danger.

As of this moment the road is three fourths the way finished. The finishing of the road is at halt for wildlife reasons. The planned route goes through a major wildlife refuge camp. This causes a fear of endangering our communities wildlife and their habitats. As much as we love animals and don't want to endanger any species, we also love humans.

With King Cove having such unpredictable weather, air travel is never promising. Since the road wasn't finished, we were giving a hovercraft. This is expensive and not reliable. It seems to be under maintenance a lot and like aircrafts, has restrictions. It is unable to run on high winds, and chilled days.

The finishing of the road isn't as expensive as keeping the hovercraft running. ~~This will save the borough tons of money, along with.~~ With the hovercraft you have to pay for training, employees, gas, and maintenance. Whereas the ~~future~~ road just needs funding for maintenance once in a while and the finishing of it. The City of King Cove needs the connecting road to Cold Bay.
