MEMORANDUM OF POINTS AND AUTHORITIES IN SUPPORT OF DEFENDANT ALASKA REDISTRICTING BOARD'S MOTION FOR SUMMARY JUDGMENT RE: RILEY PLAINTIFFS' CLAIM HOUSE DISTRICTS 1 THROUGH 5 HAVE UNNECESSARILY HIGHER DEVIATIONS FROM THE IDEAL DISTRICT

I. INTRODUCTION

Plaintiffs Riley and Dearborn ("Riley Plaintiffs") claim the Alaska Redistricting Board's ("Board") 2013 Proclamation Plan fails to comply with Article VI, section 8 of the Alaska Constitution because House Districts 1 through 5 allegedly contain "unnecessarily higher deviations from the ideal district population and do not contain populations as near as practicable to the quotient obtained by dividing the population of the state by forty." All of the districts within the Fairbanks North Star Borough

First Amended Renewed Application to Correct Errors in Alaska State Legislative Redistricting Plan After Remand at ¶ 16 ("Riley Plaintiffs' Renewed Application"). The Riley Plaintiffs incorrectly cite to Article VI, section 8 of the Alaska Constitution, which pertains to the creation of the redistricting board and how each member is appointed. *See* Alaska Const. art. VI, § 8. Section 8 has nothing to do with the House and Senate district boundary requirements. Article VI, section 6, on the other hand, requires House districts "be conformed of contiguous and compact territory containing as nearly as practicable a relatively integrated socio-economic area" and "contain a population as near as practicable to the quotient obtained by dividing the population of the state by forty." Alaska Const. art. VI, § 6. The Board will presume for the sake of argument that the Riley Plaintiffs intended to cite to Article VI, section 6 despite their failure to correct the citation in their First Amended Renewed Application. As established herein, the Board's 2013 Proclamation Plan complies in all respects with the requirements of Article VI, section 6.

("FNSB"), House Districts 1 through 5, have a deviation of less than one-half of one percent, with three districts having a deviation of less than one-fifth of one percent from the ideal district size.² Each district is less than 100 people either short of, or in excess of, the ideal district size of 17,755 people.³ The overall deviation in these five districts is 0.92%, less than one percent, while the overall deviation of the 2013 Proclamation Plan is 4.2%. These are the lowest deviations in redistricting history, even lower than both the original 2011 Proclamation Plan and the Amended Proclamation Plan. There is no genuine issue of material fact that House Districts 1 through 5 contain a population as near as practicable to the ideal district size while simultaneously complying with the other constitutional requirements of compactness, contiguity, and socio-economic integration. The Board is entitled to summary judgment.

II. FACTS

The 2010 Census reported the state of Alaska has 710,231 people.⁴ Thus, the ideal House district would contain 17,755 people.⁵ House District 1 is 29 people short of an ideal district, with a -0.16% deviation from an ideal district size.⁶ House District 2

is seventeen people short, with a -0.10% deviation from an ideal district size. House District 3 is 82 people short, with a -0.46% deviation from an ideal district size. House District 4 has 31 people more than the ideal district size, with a deviation of 0.17%. House District 5 has 82 people more than the ideal district size, with a deviation of 0.46%, resulting in an overall deviation in the Fairbanks area of 0.92%. 10

III. LEGAL STANDARD

Rule 56 of the Alaska Rules of Civil Procedure provides that summary judgment should be granted if there is no genuine dispute as to material facts, and if the moving party is entitled to judgment as a matter of law.¹¹ The moving party has the burden of showing that there are no genuine issues of material fact.¹²

Once the moving party has met this burden, the non-movant "is required, in order to prevent the entry of summary judgment, to set forth specific facts showing that [he] could produce admissible evidence reasonably tending to dispute or contradict the

 $^{^{12}}$ *Id*.

movant's evidence, and thus demonstrate that a material issue of fact exists."¹³ Any allegations of fact by the non-movant must be based on competent, admissible evidence.¹⁴ The non-movant may not rest upon mere allegations or denials, but must show that there is sufficient evidence supporting the claimed factual dispute to require a fact-finder to resolve the parties' differing versions of the truth at trial.¹⁵

IV. ANALYSIS

The cornerstone of redistricting is one person, one vote. To achieve this goal, the Alaska Constitution requires each House district contain "a population <u>as near as practicable</u> to the quotient obtained by dividing the population of the state by forty." The overriding objective is "substantial equality of population among the various districts, so that the vote of any citizen is approximately equal in weight to that of any other citizen in the state."

The legislature recognized it is impossible to create 40 House districts each with an exact ideal population, and, accordingly, included the language "as near as

¹⁷ Kenai Peninsula Borough v. State, 743 P.2d 1352, 1358 (Alaska 1987), quoting Reynolds v. Sims, 377 U.S. 533, 579 (1964).

practicable."18 Although Federal law permits a ten percent overall deviation from the

ideal district, the "as near as practicable" language added to the Alaska Constitution in

1998 makes Article VI, section 6, in many cases, stricter than the federal threshold.¹⁹

The Alaska Supreme Court acknowledged, however, that in urban areas in particular,

the population is sufficiently dense and evenly spread to allow minimal population

deviations, especially in light of the newly available technological advances.²⁰

In the 2001 redistricting cases, the Alaska Supreme Court found the overall

deviation of 9.5% in the Anchorage House districts unconstitutional.²¹ The high court

did not, however, reject deviations of up to 5% in the Fairbanks or Kenai Peninsula

The Supreme Court agreed with Judge Rindner that these population districts.²²

deviations in the amended plan did not violate the equal protection requirements of the

Alaska Constitution.²³ The highCourt also approved the amended Anchorage districts

¹⁸ Alaska Const. art. VI, § 6.

¹⁹ In re 2001 Redistricting Cases, 44 P.3d 141, 145-146 (Alaska 2002).

 20 *Id*.

²¹ *Id*.

²² In re 2001 Redistricting Cases, 47 P.3d 1089, 1094-1095 (Alaska 2002) (agreeing with Judge Rindner's finding that since the Supreme Court did not require the Board to reduce the deviations in other areas as it did with Anchorage, all the other population deviations of the June 18, 2001 plan were affirmed). House Districts 7 through 11 in the Fairbanks area had deviations of 4.8%, 4.0%, 5.0%, 2.8%, and 5.0% respectively in the June 18, 2001 plan. See Exhibit A (Proclamation Population

Analysis and House Districts 7 through 11 Maps).

MEMORANDUM OF POINTS AND AUTHORITIES IN SUPPORT OF DEFENDANT ALASKA REDISTRICTING BOARD'S MOTION FOR SUMMARY JUDGMENT RE: RILEY PLAINTIFFS' CLAIM HOUSE DISTRICTS 1 THROUGH 5 HAVE UNNECESSARILY HIGHER DEVIATIONS FROM THE IDEAL DISTRICT

Fax: (907) 263-6345

which brought the deviations all within 1.1% of an ideal district size, with an overall

deviation in the Anchorage area of 1.35%.24

House District 1 has a deviation of -0.16% from the ideal district of 17,755

people, short only 29 people.²⁵ House District 2 is 17 people short, with a -0.10%

deviation from an ideal district size.²⁶ House District 3 has a deviation of -0.46% and is

short 82 people, while House District 4 has 31 people more than the ideal district size,

with a deviation of 0.17%.27 House District 5 has 82 people more than the ideal district

size, with a deviation of 0.46%.28 The overall deviation in the Fairbanks area is 0.92%,

less than one percent for five House districts.29

These deviations are far less than those previously upheld by the Alaska Supreme

Court in 2002, and less than the deviations in both the original 2011 Proclamation Plan

and the Amended Proclamation Plan.³⁰ The five House districts containing population

²⁴ *Id.* at 1094.

³⁰ See ARB00006583; see also ARB00015160.

from the FNSB in the original 2011 Proclamation Plan (House Districts 1 through 5)

had deviations of 1.40%, 1.51%, 2.03%, 1.96%, and 2.08% respectively.31

The Riley Plaintiffs did not challenge any of these deviations as being

unnecessarily high or failing to contain a population as near as practicable to the ideal

district size.³² In fact, the plan submitted by counsel for the Riley Plaintiffs on June 21,

2013, the Gazewood & Weiner Plan, had much higher deviations in the Fairbanks

districts than those they now challenge.33 House Districts 6 through 10 in the

Gazewood & Weiner Plan contain population from the FNSB and have deviations of

2.44%, 0.06%, 0.66%, 1.00%, and 0.93% respectively. Only one is less than one-half of

one percent, while the deviations of all five of the Board's House districts presently

being challenged by the Riley Plaintiffs are less than one-half of one percent.34 The

deviation of the Fairbanks area in the Gazewood & Weiner Plan is 2.38%, while the

Board's is less than one percent at 0.92%. The overall deviation of the Gazewood &

Weiner Plan is 9.9%, barely under the federal threshold of ten percent, while the overall

deviation of the Board's 2013 Proclamation Plan is 4.2%, the lowest in redistricting

history.

³¹ ARB00006583.

³² See ARB00006452-6456.

³³ ARB00017295-17304.

³⁴ ARB00017353.

PATTON BOGGS LLP 601 West Fifth Avenue Suite 700 Anchorage, AK 99501 Plainly, the deviations of House Districts 1 through 5 are, as near as practicable, equal to an ideal district size. The Board was able to achieve such low deviations while also creating compact, contiguous, and socio-economically integrated districts. As this Court noted in its February 3, 2012 opinion, while the Board's intent to achieve low deviations is commendable, it must live in harmony with the other constitutional requirements.³⁵ This Court explained "the Supreme Court's instruction did not imply that justification for deviating from the lowest possible deviation would not be accepted[;] [i]t simply stated that the Board must try to achieve low deviations."³⁶ The Board has done just that. It has achieved lower deviations than any previous redistricting plan, including the Riley Plaintiffs' own proposed plan, and it did so all while harmonizing with the other constitutional requirements.

V. CONCLUSION

House Districts 1 through 5 do not contain unnecessarily higher deviations from the ideal district size. These districts contain "as near as practicable" a population equal to the ideal district and therefore comply with Article VI, section 6 of the Alaska Constitution. Accordingly, the Board is entitled to summary judgment on this matter.
